

# Double check valve pilot-operated, sandwich type Z2S6

WN 6 |  $p_{max}$  35 MPa |  $Q_{max}$  60 dm<sup>3</sup>/min | WK 450 360

## DATA SHEET - OPERATION MANUAL

### APPLICATION

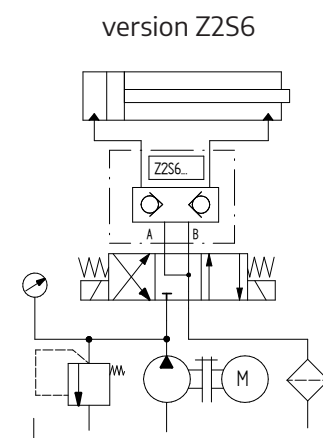

Double check valve, pilot operated, sandwich type **Z2S6...** is used for cutting off oil flow in one direction (with a possibility of controlling its opening) and opening free flow in the opposite direction. The valve is usually used for:

- unloading the valve that is under pressure
- preventing load drop in the event of a circuit break
- preventing creep movements of the blocked receivers.

The valve is used for sandwich mounting (inter-plate) in any working position.

### EXAMPLE OF APPLICATION

### DESCRIPTION OF OPERATION

Double check valve, pilot-operated type **Z2S6...** was made by fitting into one body **1** two pilot-operated check valves **2** and **3**. In the direction of flow from **A1** to **A** or from **B1** to **B** there is a free flow, but from **A** to **A1** or from **B** to **B1** the flow is closed. If there is a flow in the valve e.g. from **A1** to **A**, the piston **4** is moved to the right and pushes on the seat the pre-opening ball of the check valve **3**. Flow from **B** to **B1** is now open. The valve operates in a similar way at flow from **B1** to **B**. Pressure loss in lines **A1** or **B1** causes both valves to close. In order to obtain a safe and tight closure of both valves, the **A1** and **B1** lines must be connected with the drain.

### TECHNICAL PARAMETERS

hydraulic fluid, oil cleanliness class	mineral oil ISO 4406 class 20/18/15		
nominal fluid viscosity	37 mm <sup>2</sup> /s at temp. 55°C		
viscosity range	2,8 ÷ 380 mm <sup>2</sup> /s		
fluid temperature range (in tank)	recommended: 40 ÷ 55°C; max. -20 ÷ 70°C		
ambient temperature range	-20 ÷ 70°C		
max. working pressure, max. control pressure	35 MPa		
cracking pressure:	0,15 MPa	0,15 MPa	0,3 MPa
area ratio ( valve surface / piston surface )	1:2,97		
weight	0,8 kg

## PERFORMANCE CURVES

for fluid viscosity  $\nu = 41 \text{ mm}^2/\text{s}$  and temperature  $t = 50 \text{ }^\circ\text{C}$

### Flow resistance curves

performance curves  $p - Q$  of the check valve typ **Z2S6...**

flow direction	number of characteristic chart		
A1 → A / B1 → B	cracking pressure		
	0,1 MPa	0,15 MPa	0,3 MPa
	1	2	3
A → A1 / B → B1 (adjusted check valve)	4		

## OVERALL AND CONNECTION DIMENSIONS

### version Z2S6...

1. o-ring 9,2 x 1,8 - 4 pcs./set (P, T, A, B)
2. porting pattern of the subplate compliant with standards ISO 4401, designation ISO 4401-03-02-0-94 (CETOP 03)
3. required surface quality of the valve contact surface

### version Z2S6...XY...

1. o-ring 9,2 x 1,8 - 4 pcs./set (P, T, A, B)
2. o-ring 4,87 x 1,8 - 2 pcs./set (X, Y)
3. porting pattern of the subplate compliant with standards ISO 4401, designation ISO 4401-03-03-0-94 (CETOP 03)
4. required surface quality of the valve contact surface

## HOW TO ORDER

### 1 nominal size (NS)

NS6 = **6**

### 2 version with:

with two valves = **∅**  
 with a valve at port A = **A**  
 with a valve at port B = **B**

### 3 series number

series 41 = **41**  
 (40-49) connection and installation dimensions unchanged

### 4 cracking pressure

0,1 MPa = **10**  
 0,15 MPa = **15**  
 0,3 MPa = **30**

### 5 connection type

without ports X, Y = **∅**  
 with ports X, Y = **XY**

### 6 sealing type

NBR (for fluids based on mineral oils) = **∅**  
 FKM (for fluids based on phosphate esters) = **V**

### 7 further requirements = \*

(to be agreed upon with the Manufacturer)

∅ indicates that the box should be left blank.

The **symbols in bold** are the preferred versions available in short delivery time.

Coding example: **Z2S6 - 41/10**

## SUBPLATES AND MOUNTING SCREWS

Subplates must be ordered according to data sheet:

**WK 496 480**. Subplates symbols:

G 341/01 - threaded connections G 1/4

**G 342/01 - threaded connections G 3/8**

G 502/01 - threaded connections G 1/2

### NOTE:

Subplate symbols **in bold** indicate the preferred versions, available in short delivery time.

Subplates and mounting screws for mounting the valve:

**M5 × L\* - 10,9** acc. to **PN - EN ISO 4762 (PN/M-82302)** **4 pcs./set** delivered on a separate order.

Tightening torque of the screws **M<sub>d</sub> = 9 Nm**.

### NOTE:

(\*) - required length of L screws depends on the type and number of elements in the stack.
